Improving Electronic Delivery of Court Documents in Croatia (G2B and G2C)

In this project Croatian Post, Ministry of Justice and Public Administration and IT company SedamIT will develop and implement a solution for electronic exchange of documents between Ministry of Justice and Public Administration and citizens/business. This project will ensure digital delivery of registered item with digital advice of receipt according to eIDAS regulation.

EU certificated digital receipt and delivery of registered item will ensure that the Ministry of Justice and Public Administration´s items are receipt and delivered in digital mailbox provided by Croatian Post called ePošta.

This project will enhance current hybrid mail model that is successfully used for over a year between Ministry of Justice and Public Administration and Croatian Post.

Croatian Post is project coordinator while project beneficiaries are Ministry of Justice and Public Administration and IT company SedamIT.

PROJECT ID

Project name:
Improving Electronic Delivery of Court Documents in Croatia (G2B and G2C)

Project subject:
Innovative ICT solution for electronic exchange of documents between Ministry of Justice and Public Administration and citizens/business

Project value:
309.769,20 €

Project duration:
18 months; from January 1st , 2020 till June 30th , 2021

Project purpose:
Enhancing current hybrid mail solution by creating an Access Point in Ministry of Justice and Public Administration IT system that will connect with Access Point in ePošta system. That way we´ll be able to do the entire electronic document exchange according to eDelivery standards.

Project consist of:
a) development and implementation of Access Point at Ministry of Justice and Public Administration
b) integration of Access Points with document management system
c) upgrading current document exchange system to the eDelivery level
